PlanetU Campus ERP

User guide: Student

Signing in

Institute code, choose Student, your student ID (PRN) and password, tick "I'm not a robot".
The office gives you a one-time password when you are enrolled. The app asks you to change it the first time you sign in.

Get the app

Open the "Get the app" page (/install on the site). Your device is marked.
Android: download the app and open the file. iPhone or iPad: tap Share, choose Add to Home Screen, tap Add. Computer: use the install icon in the address bar, or File then Add to Dock in Safari on a Mac.

Your home page

- Cards for your attendance, next class, work due this week, fees due, next exam and latest result.
- The attendance card says how many classes you can still miss, or how many you must attend to reach 75%.
- "To do" lists what is next, most urgent first.

Scan for attendance (college and university)

When the teacher shows a QR code, tap Scan in the bottom bar and point the camera at it.
You will see "Attendance marked successfully". The code changes every few seconds, so a photo of it will not work.

Assignments

Coursework shows work still "To do". Choose "Open and hand in", write or attach, and submit.

Fees

Fees shows each charge, its due date and what is paid. Pay online if it is switched on, otherwise at the fee counter.
Every payment has a receipt to download.

Results

Results shows each published exam with marks, grade and GPA. Download the report card from there.

Certificates

Certificates, Request next to the one you need, say what it is for. Download it once the office issues it.

The What-if meter

The Attendance card on your home page has a slider. Move it to see what your attendance becomes if you miss more classes. It uses your real counts and changes nothing.
